

Report on results of information campaign “Caring for all life under the Sun – 2017”

On 24-28th of July 2017 the representatives of Ozone center conducted the information campaign, under logo of “Caring for all life under the Sun”, in children’s summer camps of Issyk-Kul oblast, it was dedicated to 30th anniversary of Montreal Protocol.

The main aim of the information campaign was to spread information about the climate change, negative effects of ultraviolet radiation in the sun light, as well as to acquaint children with the methods of protection against harmful UV radiation.

The program consisted of introductory lecture “Ozone and climate: methods of adaptation to the implications of climate change and protection against harmful UV radiation”; watching educational movie “UV protection”; presentation of poster “Safety is in the first place”, playing the game “Ozzy Ozone” and quiz. Gifts, such as colored comic “Ozzy Ozone”, children book “Sun and my friend Muk”, working book “Protect yourself from the sun”, was distributed among children from summer camps. More than 2300 children participated the campaign.

There were spread out about 100 posters “Safety in the first place” in Russian and Kyrgyz languages. during the activities, these posters contained information on UV index, methods of protection against UV radiation and implication to the human health from excessive exposure to UV radiation, also to brochures “Protection from ultraviolet radiation” was given to counselor.

Senior camp counselors have shown considerable interest in this campaign, noting the importance of it for children. They recommended carrying out this campaign during the summer season for all streams of children. There were suggestions from camp counselors that would be very effective to organize workshop or training on this subject for the directors and camp counselors of children's summer camps.
